Report
Visit to Industrial Training Institute

The student admitted to the MBA programme comes from diverse streams of arts, commerce, science domain. Various courses in MBA curriculum have references to various production processes, equipment and techniques. Due to the non-technical background, these students normally have not visited shop floors of any industry. The students are unaware of manufacturing processes, various tools and fixtures, machinery and manufacturing operations and find it difficult to relate and understand the concepts.

To bridge this gap, a visit of MBA students was conducted to Camp Education Society's Industrial Training Institute on May 31, 2022 accompanied by Director, Dr. Bharat Kasar and Dr. Rajesh Londhe.

The trainers from the Industrial Training Institute explained the operations performed on Lathe machine, Drilling machine, Milling Machine, Grinding machine, Cutting tools and fixtures and their basic functions related to electrical, fabrication and welding. Dr. Bharat P. Kasar discussed the references of industrial tools & techniques to basics of operations management and cost accounting.

The objective of making the non-technical students aware about the technical aspects of production and operations were fulfilled. Students appreciated the inputs they received through the industrial visit.

The visit was coordinated by Prof. Dr. Rajesh Londhe.
