REPORT
Workshop on "Derivative Fundamentals"

Derivatives are powerful financial tools that can be used for risk management, speculation, and arbitrage. While the concept of derivatives may seem complex, it's important for management students to have a basic understanding of these financial instruments, as they form an integral part of the global financial markets. By raising awareness of derivatives at an early stage, students can gain a foundational understanding of how these financial instruments work, their potential benefits, and the risks involved. This early knowledge can serve as a valuable asset as they advance in their academic and professional management careers, making them better informed about the financial world.

With this objective in mind, the institute organized a dedicated workshop for postgraduate and final-year undergraduate students from the local area, many of whom are on the verge of starting their professional careers. An one hour workshop on "derivative fundamentals" sponsored by National Commodity Derivative Exchange of India (NCDEX) was organized on October 22, 2024 at our institute.

The workshop began with opening remarks from the Director, Dr. Bharat Kasar, who encouraged students to actively engage in the session and highlighted the importance of understanding the fundamental concepts of derivatives. The workshop was conducted by Mr. Rohit Warman, NCDEX Empanelled Expert followed by a question-answer session which facilitated the student participants to clarify their doubts. The workshop benefited 55 student participants. The workshop was anchored by MBA second-year students Ms. Srinitya Ganesh, with guidance from Dr. Rajesh Londhe and Prof. Ritu Kasliwal.
